

# MATALAN (RSL) RESTRICTED SUBSTANCE LIST

**Matalan requires all of its suppliers to be aware of all current legislation and directives regarding hazardous substances that apply to their products and ensure their products comply.** It is a legal requirement that the materials used Matalan consumer products and packaging, do not contain hazardous materials, or traces of them, above the limits specified in the relevant legislation like the UK & EU REACH Directive, the Packaging Directive, the RoHS Directive, etc.

It is the responsibility of all Suppliers' to be aware of all current legislation and directives regarding hazardous substances, including UK& EU REACH, and Matalan recommend that all Suppliers test their Products where applicable to ensure that the relevant laws are not contravened. This includes the need to be aware of updates to UK & EU REACH, which covers various restricted substances, and to be up to date regarding the listed SVHC's on the UK & EU REACH Candidate List.

The following information regarding applicable directives, testing, best practices and legislation is provided to the Supplier as a guideline only and is subject to ongoing updates and amendments. The Supplier must note that the list is not exhaustive and there may be other requirements that apply or change. The Supplier has full responsibility for the awareness of directives, testing, best practices, and legislation and must ensure that they are up to date with all relevant matters.

The Supplier should have a comprehensive knowledge & expertise of their product & must ensure they are fully aware which directives and testing requirements are applicable to their Products. If the Supplier is in any doubt, they should always contact an accredited test laboratory in the first instance prior to contacting their relevant Technical Services Technologist.

This document lists all the substances that are either banned or restricted under the MATALAN Restricted Substance Standards. For details of specific limit values for each chemical, please review MATALAN supplier QA Manual Section 8.14.2

Zirconia Aluminosilicate Refractory Ceramic Fibres	are fibres covered by index number 650-017-00-8 in Annex VI, part 3, table 3.1 of Regulation (EC) No 1272/2008 of the European Parliament and of the Council of 16 December 2008 on classification, labelling and packaging of substances and mixtures, and fulfil the three following conditions: a) oxides of aluminium, silicon and zirconium are the main components present (in the fibres) within variable concentration ranges b) fibres have a length weighted geometric mean diameter less two standard geometric errors of 6 or less micrometres ( $\mu\text{m}$ ). c) alkaline oxide and alkali earth oxide ( $\text{Na}_2\text{O}+\text{K}_2\text{O}+\text{CaO}+\text{MgO}+\text{BaO}$ ) content less or equal to 18% by weight	-	-

### Note on Phthalates

1. Toys - are defined in the Toys Directive 88/378/EEC as "any product or material designed or clearly intended for use in play by children of less than 14 years of age".

2. Childcare Articles - are defined as "any product intended to facilitate sleep, relaxation, hygiene, the feeding of children or sucking on the part of children. Sleeping bags are designed to facilitate sleep and fall into this category. A child's bib for this purpose is a hygiene item and falls into the scope.

The interpretation of Textiles and nightwear - The main purpose of nightwear is to dress the child whilst sleeping, not to facilitate sleep. Nightwear should therefore be regarded as textiles and, like other textiles, do not fall under the scope of this directive. For Matalans purpose all badges, prints or additional attachments on or to a nightwear item, should follow the directives scope for toys and childcare articles.

The commission interprets that for toys and childcare articles which can be placed in the mouth, the above directive 2005/84/EEC covers easily accessible areas or parts of items such as car seats, bike seats, push chairs, cots and cot accessories, prams and pram accessories, or any other article used to facilitate a child's sleep. For Matalans purpose, any textile or item produced in any of the above areas falls into the Directives Scope. Matalan recommend that the use of PVC is removed in all articles stated above to avoid / reduce the possibility of phthalate content. Soft Plastic Type Materials are likely to contain plasticizers aiding the material in its softness and handle appeal. Materials to be tested, refer to restricted substance table above.
